REMEDIES

WHY PREGNANCY NUTRITION MATTERS

During pregnancy, your body requires:

- Higher protein intake
- Essential vitamins & minerals
- Healthy fats
- Adequate hydration

Proper nutrition supports:

- Baby's growth & development
- Mother's energy & health
- Reduced risk of deficiencies

DIET APPROACH

- Nutrient-dense meals
- Balanced macronutrients
- Easy digestion foods
- Frequent small meals

To help you:

- Support fetal development
- Maintain maternal health
- Prevent fatigue & weakness

FOODS TO AVOID

- Raw or undercooked eggs
- Raw or undercooked meat, fish, or chicken
- Unpasteurized milk and dairy products
- Alcohol
- Packaged snacks and fast food
- Excess sugar and desserts
- Excess caffeine
- Energy drinks
- Highly spicy and oily foods
- Street food with hygiene concerns
- Papaya (unripe) and pineapple (in excess)

RECOMMENDED FOODS

- Protein: paneer, eggs, chicken, dal
- Healthy fats: ghee, coconut oil, nuts
- Carbs: oats, brown rice, millets
- Fruits & vegetables
- Dairy / plant-based milk

***NOTE:** Always consult your doctor before making major dietary or supplement changes during pregnancy.*
